Actual News about [Large Format Printing](#)

A free of charge information service

Distributor: CREAT, Hamburg; chief editor: Wolfgang Hey
Published by: Neun Punkt GbR, Hamburg

Tuesday, 2002-09-03

Dear readers, dear friends,

great shows are coming soon. SGIA show as well as photokina and Viscom Europe. The industry will meet and find out what could be done to improve the economic situation. It's not even the technology, new developments. Of course new solutions, new media and new machines every time will give a kick, but there must be the time to earn the money with the done investment. Nevertheless first of all economics happens in the mind of the people. So I hope you will come to these shows (keep in mind Prosign, Frankfurt Germany in November) with positive thinking and find friends and motivation for business growth.

What my team and myself found last month, we collected and hope it will be a valid information for you. Enjoy!

Sincerely
Wolfgang Hey

1) Visual Communication Trade show

Visual Communication 2002, September 18-19-20, is the European forum for professionals and users of visual communication. The exhibition features, a combination of techniques and technologies, used in the field of visual communication for marketing and advertising purposes, using brands, logos, messages, and so on. Exhibitors include manufacturers and dealers of technologies as varied as digital printing, adhesive cutting, engraving, screen printing, textile marking, signage, brands, video screens, lighting panels, etc. The huge irruption of digital techniques in the world of graphic art has significantly changed the overall picture. New markets and niches have appeared offering new products and services to a wide-ranging, diverse clientele. Visual Communication 2002 presents an overview of all the latest developments which have appeared in the world of visual communication, digital imagery and graphic art.

2) GBC Films Group at Visual Communication

GBC Films Group Europe shows at **Visual Communication Europe, Paris in hall 7.3, booth A11** for the first time in Europe the new Falcon 80+. It is part of a new range of upgradable laminators for the professional wide-format laminating market, announced at Ipex in Birmingham. To support the demand in the market for printing up to 2m wide, GBC Films Group has developed the Falcon 80+ TH/DH. This version is available in two versions, the TH-version with top-heated roller up to 160C and the DH version with double heated roll. Both models can mount prints up to 3cm thickness and 2m wide. Typical applications include mounting, hot-, cold lamination and encapsulation. Standard-features are vacuum feeding-table, cooling fans, side-cutting knives, 3 unwinds and 3 rewinds which enables the user to work from roll-to roll. Inkjet transfer and electrostatic transfer are additional functionalities of the Falcon 80+ DH.

3) The introduction of JetLine Ecosol inks

Graphical Computer Solutions is a leading developer and supplier of solutions for posterprinting and poster finishing. GCS announced the introduction of JetLine EcoSol Inks for the wide format printing industry. This innovative mild solvent Ink, developed by GCS, will be unveiled at **Visual Communications Europe, Paris, 18-20 September, hall 7.3, booth A68**. GCS will demonstrate these inks using an as a

flatbed configured Mimaki JV4 Printer. With this, Multi Purpose Inkjet will be printed on a wide variety of both rigid and flexible materials, reaching printing speeds of up to 36m²/h (360 x 360dpi). By using the fast drying JetLine Ecosol inks on this printer, GCS exclusively offers a high quality, scratch resistant solution for printing on rigid and flexible materials up to 7 mm at only a fraction of the cost of any other Flatbed system. Jetline Ecosol Inks can be applied with all printers that make use of Epson DX3 and DX4 Piezo print heads. They are suitable for indoor and outdoor short and medium term applications where scratch, water- and pollution resistance is of prime importance. JetLine Ecosol inks provide a UV durability up to 18 months. Potential applications include trade show graphics, billboards, point of sale posters, textile and PVC banners, pennants, artist reproductions and promotional fleet graphics.

4) creativ collection Photo Service

First class photos for LFP? No problem! The photo service from creativ collection Publishers guarantees the right product for the commercial modeling of outdoor advertising (big format digital printing), car lettering, brochures, adverts, covers, web sites, posters and much more. The photos are sorted according to various themes like: stones, soil/sand, wood, leaves/plants, food, water/ice, architecture/landscape, sky/space, metal, cloth/furs, media, money, frames, eye-catchers, spring, summer, fall, winter, neon, golden objects, etc... Digital quality is what is most important to creative collection. creativ collection Publishers, traditionally conscious of high demands, offers with its products the expected quality: drum scans, 304 dpi on A4-overformat (22 x30,7 cm) EPS-JPEG- in maximum professional quality. All the photos are separated in four colors CMYK and can be enlarged to poster-format without any loss of sharpness or quality. The right to use creativ collection motives surpasses in many ways the usual conditions of other conventional photo services. There are no limitations in the edition and all of the pictures can be utilized as often as you wish (obviously according to the usual license regulations). Since most of the motives are created in CC's ateliers, clients will receive a high copy right protection, which is not the usual case. The creativ collection Photo-Service offers the highest professional quality at an unbeatable relation price-performance. Visit creativ collection at **Visual Communications Europe, Paris in hall 1.2, booth B71**.

6) photokina: More than just a show

The long-standing visitors at photokina are already familiar with all that the World of Imaging in Cologne has to offer. The fair presents not only a comprehensive overview of the latest innovations on the global photographic and imaging market, but also a whole host of specialist and cultural supporting events. The support programme at the forthcoming photokina, which will take place from **25th to 30th September 2002**, will be tailored more closely than ever before to the needs of the individual visitor target groups, dealers, users and consumers. In order to provide all of them with optimum opportunities to exchange information, share expert knowledge, communicate with each other, and enjoy some new experiences. The broad spectrum of events covers top-class international congresses, panel discussions, seminars on current sector-related topics, communication and action centres, special shows, photo exhibitions, video presentations, award ceremonies and other events.

7) Everywhere at photokina

Best GmbH, provider of solutions for the print and publishing market, will present at photokina 2002 **in hall 10.1, booth E011/E019** tools and solutions tailored specifically to the needs and workflows of digital photographers. The daily presentations and workshops at the Best booth, deal specifically with the photo workflow and are supported by top-class partners: data input will be done via digital cameras from Jenoptik and Phase One, Adobe with their de-facto standard Photoshop, will be responsible for image processing, while »Best Photo Edition« and »Best PhotoXposure« will be used to output the data. In addition, prospective customers will find Best's photo solutions at numerous partner booths: ADF/Canon 10.1/D009, Canon 02.2/B021-C020, Hahnemühle 10.1/L024, HP 08.2/A004, Jenoptik 01.1/B030/C030, Linhof-Anagramm 10.1/U008, Phase One 10.2/O030, PSL 10.2/P008, PSL 10.2/N010/O011, Rauch 10.1/G050, Sinar 10.2/N019/O011, Tecco 10.1/L050. If you like to know whom to contact at these booths to know more about the different application, visit the homepage of Bestcolor and find related names.

8) Innovation, Quality and Stability!

As manufacturer of Wide Format and A4/A3 media, Arkwright invites all end users but mainly dealers and distributors looking for media to be added to their own brand, to **photokina, Hall 10.1, booth J020**. All employees of Arkwright are 100% focussed on the development, manufacturing and distribution of media for Inkjet-printers and Colour Laser Printers. This will be demonstrated introducing new media: Instant-dry Photo Papers, besides the new photo papers introduced at the Fespa in June, White Film, top in print-quality with excellent laminating & mounting, Outdoor Banner, 400 micron, with Light-Block, Outdoor-backlit and Self-adhesive Photo Paper (400% ink-load). What Arkwright will show further is how digital images come alive with fantastic quality on all type of surfaces. A4/A3 Novelties that Arkwright will show on the photokina: New range of Photo Papers from 100 – 260 g/m², instant-dry and real photo-base, New generation Transfer media for textiles and other surfaces, a wide range of stickers, CD-labels and self-adhesives with Photo-quality, a complete range of printable media for the office environment and an extensive range of fun-products for the creative home-user. Arkwright does not deliver to end-users. The aim is to make dealers and distributors brands succesfull.

9) News from Zünd

The new large format flatbed printer Zünd UVjet 215-Combi prints with environmental friendly UV curable ink, on rigid and flexible materials up to 40mm thick, on smooth and uneven surfaces. With a print width of up to 2150mm the UVjet 215-C opens exciting new opportunities for signage, advertising, exhibition graphics and many other applications. It prints directly to uncoated materials like plexiglass, wood, foamboard, PVC, wood, glass, aluminium, cardboard, banners etc, for indoor and outdoor use. The Zünd plotters are ideal for cutting printed boards, sheets or rolled materials. The optical vision system I-Cut ensures always perfect contour or trim cut. Together with the automatic feeding system the productivity is increased substantially. At **photokina** in Köln the UV-printer with cutting plotter will be shown in **hall 10.1, on booth J030 of Sihl DI:rect**.

10) LYSON - new inkjet inks and much more

Stand No. K021/022, hall 10.1 is a good place to go during **photokina** this year.

Here Lyson will unveil a range of new products to impress photographic professionals everywhere. Here are some highlights you will wonder about: An important introduction to the market leading Small Gamut range is a new six channel cartridge. The six colour option makes Small Gamut compatible with the very latest Epson desktop photo and wide format machines like the Stylus Photo 1290. By using simple colour adjustments to the image creation software, almost infinite mono variations may be produced to give the photographer complete control over print output. Lyson scores another first with new Fotonic, Lysonic, Small Gamut, Quad Black and cleaning cartridges that now incorporate ink recognition chips which are compatible with all recent Epson photo printers. This means that the photographer can install a Lyson cartridge straight from the pack without chip transfer and re-programming. Lyson will be demonstrating the complete process of digital imaging, using Lyson inkjet inks and media. The on-stand teach-in will cover image capture, manipulation, colour management and inkjet printing. Hot off the production line but ready in time for the show are Fotonic and Quad Black cartridges for the new Canon S900/S9000 photo printers. Prices will be revealed on the stand. Lyson is demonstrating a new 400ml inkjet ink bottle, running it on an Epson 1290 continuous ink systems. Lyson's proven Match Proof proofing products will be put through their paces on Epson 5000 and 7000 printers at photokina.

13) PosterJet ® 6.5 arrives at the photokina

Now, just in time for the photokina, a new version of PosterJet is being released in the shape of PosterJet ® 6.5. And it's a very convincing winner, offering a whole slew of innovative functionalities. A brand-new concept for calibration and linearization, in conjunction with GretagMacbeth's LogoSync™ professional color management engine, produces practically 100% color accuracy when printing. Come and see the highly promising software solution from Eisfeld Datentechnik from Cologne, Germany, together with Canon's new LFP generation of printers. See the new release at **photokina, from September 25-30, hall 2.2, booth C21/D20**, together with the new generation of Canon LFP printers (W2200, W7200, W7250).

14) Visit Dr. Graphix Imaging at photokina

Dr. Graphix Imaging invites to experience the latest in large format media technology. Visit the booth in **hall 10.1, booth L040 at the photokina** and experience a World of Imaging unique to Dr. Graphix Imaging. Dr. Graphix Imaging has developed a New Micro Titanium Coating. This coating is exclusive to the DGI outdoor medias. Scrim Vinyl, one side and double-sided printable, PVC Banner, Water-Fast Adhesive Matte Vinyl and TR61. DGI also introduce a new refill kit for HP 5000 large format printer. The unique design offers a refill process as simple as 1, 2, 3. Instead of handling three, 225mil. refill bags, HP5000 Refill Solution comes in one easy to use 500mil. refill tank. Simply insert the DGI HP5000 Refill Solution adapter into the HP ink cartridge then insert the DGI HP5000 Refill Solution refill tank into the adapter. Now sit back and watch the ink flow through the unique ink level indicator located on the side of the refill tank.

More Information: www.drgraphix.com

15) Photography Reproduction with ColorSpan

Now available for DisplayMaker 12: Red, orange, green and blue. The Mach 12 now has a complete set of 12 ink colors in a C₃M₃YKROGB configuration to deliver the highest quality (apparent 1800 dpi) and widest color gamut. Use the 12 colors to create amazing large-format digital reproductions of photography or fine art. Black and white photography reproduction with multi density black inks. Print stunning black and white images with the detail and tonal gradation that match traditional silver halide prints using four densities of black ink. Available for both the DisplayMaker Series XII and DisplayMaker Esprit printers, the four densities of black produce images with multiple grey levels, resulting in an apparent image resolution of 1800 dpi. Visit ColorSpan at **photokina, hall 10.1, booth H010/J011.**

More information: www.colors span.com

16) So much news from Ilford, read some here

But find all the other news at **photokina, hall 10.1, booth F010/G011.** ILFORD Imaging is set to turn the professional photographic industry on it's head with the launch of it's new STUDIO by ILFORD® digital output system. STUDIO is a complete in-house solution that gives professional photographers everything they need to reclaim the creativity and quality control that have previously been out-sourced. The STUDIO system is available as a 24" or 44" solution depending on individual requirements. The STUDIO 24 and STUDIO 44 system comprises A 24" or 44" EPSON® Stylus™ PRO inkjet printer, RipStar Studio 5.6 RIP, Integrated media barcode reader, EPSON® UltraChrome™ 7-colour ink set, a full range of barcoded STUDIO media in pre-mounts, sheets and rolls, Installation, training and support. The STUDIO system combination of cutting edge inkjet printer and media technology means the end result is a high quality, customer-ready, colour rich image. Also in Cologne ILFORD Imaging will demonstrate the dramatic advances in workflow and productivity offered by MICRONEX thermal transfer coating. MICRONEX is an ultra thin laminate that is easy to use and compatible with a wide variety of media and inks. ILFORD will demonstrate how MICRONEX can be easily applied to printed images up to 60" in width. It requires no trimming once applied and does not curl, as many film laminates are known to do.

17) Canon Confirms its Commitment to LFP

Canon Europe announces the availability of the new large-format ink jet colour graphics printers, the 35" wide W7200 and the 24" wide W7250, to selected countries in the European market. The devices have also been designed to deliver industry-leading productivity and high image resolution through revolutionary new wide print head technology. Aimed at the graphic art and photographic market, but also adaptable to the office environment, the new Canon W7200 and W7250 printers accommodate print media of up to A0 and A1 respectively and incorporate a newly developed one-inch-wide, high-density print head. Based on Canon's proprietary Bubble Jet technology, the new print head incorporates 7,680 tiny ink nozzles, 1,280 for each of the six colours, delivering industry-leading print speeds of 2 minutes per page (A0 size/fast mode), 1.5 minutes per page (A1 size/fast mode) for the W7200 and W7250 respectively. Visit Canon at **photokina in hall 2.2, booth C21/D20.**

More information: www.canon-europe.com

[Top](#)

18) 3P Inkjet Textiles at photokina

3P InkJet Textiles Corp. will announce the cooperation with Durst Phototechnik Corp. at photokina. For detailed information visit **3P in hall 10.1. at booth H040/J041** and **Durst at booth B010/C011.** Especially for Fine Art Printing, art reproduction and portrait photography 3P recommends *Twill* and *Country Cotton*. One can print these fabrics with every large format printer with dye-based-ink or pigment-ink. When printed with pigmented inks these prints are even UV-resistant and fade-proof. The textiles are available in every width up to 72". Digital printing of traditional fine Asian art can be realised with the excellent 3P silk. Because of the optimised inkjet coating these prints are reproduced optimally. Additionally 3P InkJet Textiles AG exhibits the new product line for solvent-inks. The palette of these polyester fabrics reaches from large-meshed to smooth and glossy surfaces. The textiles allow excellent outdoor as well as indoor use at a very suitable price. Two of them even got a certification of fire retardancy. Use pigment inks for photo realistic outdoor-prints without any after-treatment. 3P guarantees up to 6 month warranty for outdoor use of FlagTex, MeshTex and LighTex .

[Top](#)

19) VUTEk at photokina 2002

VUTEk Inc, will be exhibiting three of its high quality superwide printing systems, as well as their new, faster RIP station and new version of RIP software at **photokina, hall 10.1, booth K020/L021**. VUTEk's photographic quality PressVu™ UV 180/600 EC eight-color printer will be featured with the new Auto Sheet Feeder 180. The UltraVu™ 2600 EC eight-color, two-meter printer for ultra-high quality applications and the UltraVu™ 3360 EC eight-color, three-meter printer also will be on exhibition. VUTEk will also demonstrate their more powerful RIP station with enhanced ColorBurst software.

More information: www.vutek.com

[Top](#)

20) "Plug-and-Play" Ink Cartridge

Encad has implemented a new improved ink cartridge assembly that is cleaner and easier to install. The new 600-dpi cartridges come with a septum tube already installed. The septum tube is connected to the cartridge lid, which allows users to insert the tube into the ink line valve and start printing. It's easy and clean! The new cartridge improves jetting reliability so you don't have to worry about a deprime occurrence, even during long print jobs. This is achieved through a new ink filling process together with increased ink volume in the cartridge. To improve shipping reliability and shelf life, the cartridges are vacuum-packed in an aluminum foil bag. Taking centre stage on ENCAD's stand in the **Kodak Hall (Hall 4) at photokina** will be the NovaJet 880 wide-format inkjet printer, incorporating ENCAD's new plug and play cartridge and the Kodak 5260 wide-format inkjet printer. The NJ 880 and 5260 printers will feature alongside ENCAD's 36-inch, entry-level NovaJet 736 wide-format graphics printer as well as key products from ENCAD's inks and media range.

[Top](#)

21) Mutoh's partnership with Scanvec Amiable Europe

Mutoh Europe N.V. announces a close cooperation with the company Scanvec Amiable Europe for the definition and development of in-the-box workflow software for digital printing. First result of this cooperation between Mutoh and Scanvec Amiable R&D departments is the availability of a PhotoPRINT SE Mutoh Edition RIP software – based on Scanvec Amiable's PhotoPRINT SE technology – for Mutoh's new Rockhopper eco-solvent outdoor printers and the high-end Toucan series solvent-based inkjet printers. PhotoPRINT SE Mutoh Edition is available for both Windows and Macintosh platforms, provides full driver-support for all extended printer features and incorporates an original Adobe PostScript Level 3 interpreter together with industry-standard ICC colour management, ensuring optimum compatibility and output-quality and offering a seamless integration within any graphical environment. Visit Mutoh at **photokina, hall 10.1, F030**.

More information: www.mutoh.be

[Top](#)

22) HP Expands its Large Format Printer Offer

Hewlett-Packard Company unveiled two new large format printers, the HP Designjet 5500 (Foto) and the HP Designjet 100, extending its offer for large and wide format printers. The HP Designjet 5500 has been designed for print service providers, GIS and graphic professionals. It offers exceptional productivity through unrivalled printing speed, easier operation and advanced media handling without compromising print quality. The gain in productivity allows print service providers to print twice as much sellable output per day, compared to the previous HP Designjet 5000 model. The HP Designjet 5500 offers a range of intelligent features, which make it easier and quicker to use such as direct printing from file using the printer's WebAccess tool for seven commonly used file formats, including PDF and TIFF. It also allows for flexible use of dye or UV inks and a wide range of media for graphics and CAD/CAM on the same printing system. Visit Hewlett Packard at **photokina in hall 08.2 at booth A004**.

More information: www.hp.com

[Top](#)

23) "Super Bright Photo Paper"

UIG Supply, Taiwan offers media with a super bright-white coating. Its product manager, Edward Liu enhances, the 8-mil Super Bright Photo Gloss media is well performed with pigmented inks and dries instantly. He admires the waterresistant media can absorb heavier inks than other photo papers. Further, the 8-mil Super Bright Photo Paper is compatible with wide-format thermal and piezo inkjet printers, and both dye and pigmented inks. It is also suitable for use with thermal or pressure-sensitive laminate films. At UIG, you can always find out the solution for graphic business because they welcome different custom-made requests and cut all sizes to meet customers' needs.

[Top](#)

24) News from Wasatch Mountains

When using ICC color workflows, an accurate device profile of your printer, inks, and paper is essential, but it is only half the battle. Color is also controlled by your choice of ICC input profile, which determines what color device will be simulated by your prints. There are dozens of input color spaces in common use as ICC profiles, and the input profiles included with Wasatch SoftRIP are nothing more than reasonable generic defaults. Whether or not you get good out-of-box color mainly depends on how well these generic profiles match your needs. If they don't, it's easy to make changes. Wasatch is pleased to make a new assortment of input profiles available through following web page.

25) Gyricon opens new Manufacturing facility

Gyricon Media, Inc., the leading provider of SmartPaper™ media and integrated network signage solutions, announced the opening of its new manufacturing facility in Ann Arbor, Michigan, for producing electronic media and signage solutions for the retail market. The \$10 million manufacturing facility is located in Ann Arbor's Scio Township and is expected to create more than 500 jobs by 2004. Gyricon Media chose Ann Arbor because of the significant number of technology businesses and manufacturing plants already in the area, the skilled labor pool and the proximity of the University of Michigan. Earlier this year, Gyricon Media relocated its corporate headquarters to Ann Arbor from Xerox Corporation's Palo Alto Research Center.

26) DIGITAL TEXTILE 2002

Web Consulting are holding the Fifth European Seminar & Exhibition covering digital printing and pre-press technology for the textile and apparel industries in Istanbul, Turkey this autumn. Digital Textile 2002 follows upon extremely successful events in Manchester, UK; Como, Italy; Barcelona, Spain and Amsterdam, Netherlands. Turkey has been chosen as the site for the latest seminar for two main reasons: it represents the largest textile printing region in Europe, and because of its proximity to the multitude of textile printers in the Near East. The event kicks off on Thursday 7th November with the one-day study tour, which will visit AKSE Tekstil in Corlu who are already digitally textile printing. Followed by a grand format digital printer, who prints onto textile mesh and textile-reinforced scrim vinyls for indoor and outdoor applications.
